“ *Dr Freeman was an incredibly gifted and intelligent man, and had great compassion for his patients. As a midwife, he treated me with equal respect as any health practitioner. I'm so glad I had a chance to know him.*

Re cousin Mahlon's passing: I just now found as looking for his phone #. It is neat to see that he worked with a midwife (!) ... I do not know the % of doctors who do that, so I am impressed. I thought he went directly into Genetic med from the Army... did not realize he was in obstetrics too! It was so good to read your tribute here. Thank you.
